## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 04 December 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

1. Claims 1-24 are presented for examination.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Godefroid et al. (6,697,840) (hereinafter Godefroid).

4. As per claim 1, Godefroid teaches in a computer network including a server computer system network connectable to at least a plurality of clients computer systems for which the server computer system maintains presence information, a method of exercising fine grain control of access to the presence information, the method comprising the following:

An act of the server computer system receiving a request from a client computer system including an instruction to change an access permission status for at least a subset of the plurality of client computer systems, the access permission corresponding to one of the plurality of access permission types to the presence information (e.g. col. 6, lines 53-67);

Art Unit: 2154

An act of the server computer system setting at least an entry in a data field in response to the request, the entry representing the changed access permission status (e.g. col. 6, lines 53-67); and an act of the server computer system determining whether or not to allow access to the presence information based on the entry in the data field (e.g. col. 6, lines 60-67).

5. As per claim 7, it is rejected for similar reasons as stated above.
6. As per claim 8, it is rejected for similar reasons as stated above.
7. As per claim 9, it is rejected for similar reasons as stated above.
8. As per claim 14, it is rejected for similar reasons as stated above.
9. As per claim 15, it is rejected for similar reasons as stated above.
10. As per claim 22, it is rejected for similar reasons as stated above.
11. As per claim 2, Godefroid teaches the method wherein the instruction to change an access permission comprises an instruction affecting permission to view accurate presence information (e.g. col. 4, lines 5-10).
12. As per claim 10, it is rejected for similar reasons as stated above.
13. As per claim 16, it is rejected for similar reasons as stated above.
14. As per claim 3, Godefroid teaches the method wherein the instruction to change an access permission comprises an instruction affecting permission to view any presence information (e.g. col. 3, lines 13-21).
15. As per claim 11, it is rejected for similar reasons as stated above.
16. As per claim 17, it is rejected for similar reasons as stated above.

Art Unit: 2154

17. As per claim 4, Godefroid teaches the method wherein the instruction to change an access permission comprises an instruction to restrict the ability to act on presence information (e.g. col. 3, lines 35-40).

18. As per claim 12, it is rejected for similar reasons as stated above.

19. As per claim 18, it is rejected for similar reasons as stated above.

20. As per claim 5, Godefroid teaches the method wherein the instruction to restrict the ability to act on presence information comprises an instruction to prohibit sending messages to a computer system that corresponds to the presence information (e.g. Figure 2, blocks 211 and 216).

21. As per claim 13, it is rejected for similar reasons as stated above.

22. As per claim 19, it is rejected for similar reasons as stated above.

23. As per claim 6, Godefroid teaches the method wherein the data field comprises access permission fields in a database, wherein the database comprises the following for each of the plurality of client computer systems:

An identifier field that identifies the client computer system (e.g. col. 7, lines 45-60);

A presence information field that represents the actual availability of the client computer system (e.g. col. 7, lines 45-60);

A first access permission field that contains an access permission of a first access permission type when the client computer system requests access to the presence information (e.g. col. 7, lines 62-67);

Art Unit: 2154

A second access permission field that contains an access permission of a second access permission type when the client computer system requests access to the presence information (e.g. col. 7, lines 62-67); and

A manufactured presence information field to display to the client computer system if the client computer system has permission to view presence information, but does not have permission to view accurate presence information (e.g. col. 8, lines 1-8).

24. As per claim 20, it is rejected for similar reasons as stated above.

25. As per claim 21, it is rejected for similar reasons as stated above.

26. As per claim 23, it is rejected for similar reasons as stated above.

27. As per claim 24, it is rejected for similar reasons as stated above.

### ***Conclusion***
